## PROFESSIONAL SNAPSHOT

---

- **5 years** of total IT experience and **4+ years** relevant experience as an **RPA Developer**, with expertise in designing and implementing business process automation solutions using **UiPath**.
- Having good exposure on **Robotic Process Automation**.
- Involved complete RPA Lifecycle (Discovery, Design, Development, Testing, UAT, Deployment, Support & Maintenance)
- Experienced in automation of Web, Desktop, **applications** through **UiPath** tool.
- Worked on PDD (Process Definition Document) and SDD (Solution Design Document).
- Analyzed, designed, and implemented end-to-end RPA solutions to automate business processes within various **SAP modules (FI/CO, SD, MM, PP, HR)**.
- Developed stable and efficient **SAP automation** using UiPath's native WinGUI selectors and activities, ensuring resilience to minor UI changes.
- Having good exposure on Reframe work.
- Having good exposure on **UiPath Orchestrator**.
- Having good exposure on **Exception Handling**.
- Having good exposure on **UiPath Orchestrator.QUEUE CONCEPT**.
- Having good exposure on **API Integration**.
- Participated along with the Project Management team for **Client meetings**,
- Proficient in Microsoft Office Suite Word, Excel, Outlook and PowerPoint.
- Having good exposure on **AI Centre, Action Center and Document understanding**.

- Experience with using version control tools like Team Foundation Server (TFS) and GIT.
- Proficient in leading teams for running successful process operations & experience of developing procedures and service standards for business excellence.
- Knowledge on **Ui Path Agentic Automation & Gen-AI**

## TECHNICAL SUMMARY:

<b>Robotic Process Automation</b>	UI Path, Orchestrator, AI-Centre, Action Centre, Document Understanding, RE Framework
<b>Languages</b>	<b>C#</b>
<b>Platforms/operating systems</b>	Windows 2007,2008,2010.
<b>DATABASE</b>	<b>SQL</b>

## EDUCATION SUMMARY

.....

- **Bachelor of Technology (B.Tech) from Malla Reddy Engineering College, Hyderabad in Civil Engineer graduated in 2017**

## EXPERIENCE SUMMARY

.....

- Working as an **RPA Developer in KPMG in Bangalore** from August 2020 To **Till Date**

## CERTIFICATIONS

.....

### UiPath:

- **RPA Automation Developer Professional Training.**

## PROJECT PROFILE

---

### **Project 1: Automated User Termination Validation**

**Client:** Iron Mountain

**Role:** RPA Developer

**Tools:** Excel Automation, IMC Portal

#### Description:

Designed and implemented an automation solution to handle user termination requests in the IMC portal for Iron Mountain. The bot reads termination data from an Excel file and verifies if the provided date matches the current system date. If the dates match, it proceeds with the termination process in the portal; otherwise, it updates the Excel file with a rejection status and reason.

#### Roles & Responsibilities:

- Automated reading and writing of Excel data
- Implemented system date validation logic
- Built conditional flows for handling approvals and rejections.
- Automated status updates in Excel based on business rules.
- Ensured error handling and logging for process reliability.

### Project 2: US Tax Invoice Processing Client:

DHL

**Designation:** RPA Developer

**Role:** UiPath Developer

#### Roles & Responsibilities:

- Responsible for design, development and end to end implementation of RPA solution using UiPath for US Tax Invoice Processing.
- Developing automation code involving applications like Oracle R12, Microsoft Excel applications.
- Two Bots were developed to handle Excel and Oracle applications differently. The Bots were designed using latest RE framework from UiPath for smooth functioning of the automation solution and to handle all business and technical exceptions. The orchestrator queues were also used as a part of solution design to deploy, schedule, monitor and manage the Bot.

### Project 3: ARI fleet Management for CNG Vehicle Client:

Apache Corporation

**Designation:** RPA Developer

**Role:** UiPath Developer

#### Roles & Responsibilities:

- Involved in all phases of Software Development Life Cycle including design, daily meetings, designing of documentation for the project.
- Work with BA's to understand stakeholder and functional requirements
- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.
- Created and documented test procedures and scenarios for all phases of testing.
- Designed and developed Info Path for inputting data into database
- Involved in End-to-End development of Business Process using Robotic Process Automation.
- Handling coordination with the operation team in daily meetings.

### Project 4: Texas capital Bank Client:

IAG

**Designation:** RPA Developer

**Role:** UiPath Develop

#### Roles & Responsibilities:

- Involved in all phases of Software Development Life Cycle including design, daily meetings, designing of documentation for the project.
- Work with BA's to understand stakeholder and functional requirements.
- Involved in preparing the PDD and SDD documents
- Actively participating in validating the Client requirements and identifying the various Scenarios for Automation Development.
- Involved in End-to-End development of Business Process using Robotic Process Automation.
- Created and documented test procedures and scenarios for all phases of testing.
- Handling coordination with the operation team in daily meeting
